OM SUNTRONICS is leading manufacturer of High Quality Rewinder Machines with its more than 10 years of Design and Production Experience.

OM SUNTRONICS has built reputation for Innovative Product Development, Quality Manufacturing and best Service Support in the printing and packaging industry.

Our focused approach to Customer needs and our commitment to our customers have brought a great success for our company .

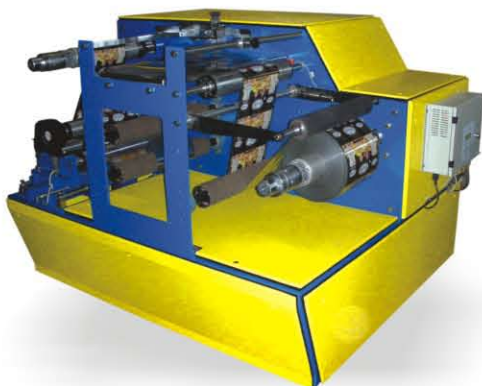

We have a goal to deliver the Best - Quality Performance & Quality Service

Our team's continual efforts towards Research & Development, latest Engineering Technology enable us to deliver **Next Generation Machines** to industry.

OM SUNTRONICS makes wide range of Rewinders for different Web application for various materials like Plain Film, Flexible Laminate, Metalised Films, Paper, Label Stock etc.

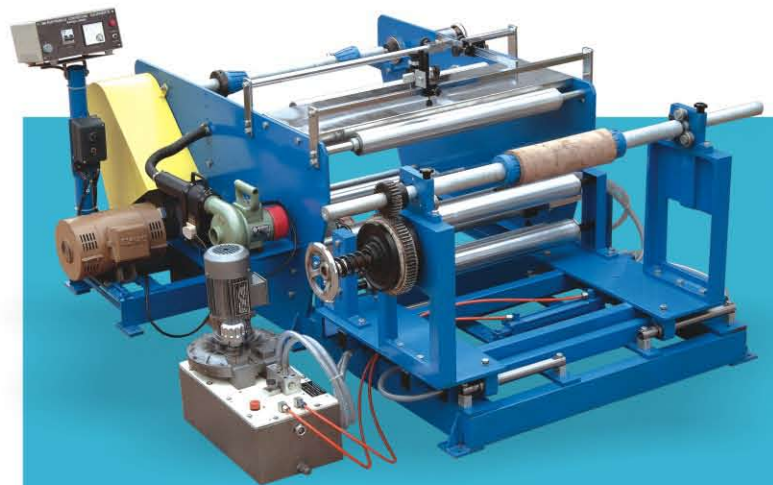

▶▶ OM REW 021 - Standard & Super Premium Series

▶▶ OM REW G 021 - Gold Series

▶▶ OM REW 021 Special Series

▶▶ OM DSP 021 Series

Various Applications

- Doctoring / Inspection Rewinder Machine
- Rewinding Machine for Ink Jet Coding
- Coil Rewinding Machine
- Salvage Rewinder with Reversible Operation

Superior Engineering

OM SUNTRONICS gives Engineering Excellence in terms of Machine Design & Performance

- Heavy Duty Construction for Vibration free Operation
- Precision components selection for round the clock duty cycle & years of operation
- Cantilever Design upto Web Width of 450 mm
- Specially designed Unwind & Rewind Shaft assembly for Quick changeover of Reels
- Mechanical Expanding system on Unwind & Rewind ease the Loading & Unloading of reels
- Tension Control Systems in all type of Machine
- Auto Edge Guide System as standard
- Various Advanced Drive Control selection for various Models
- Vector Drives Control for Precise Rewinding Quality

▶▶ OM REW TT SP 021 - Table Top Series

▶▶ OM REW TT SP 021

Optional Accessory

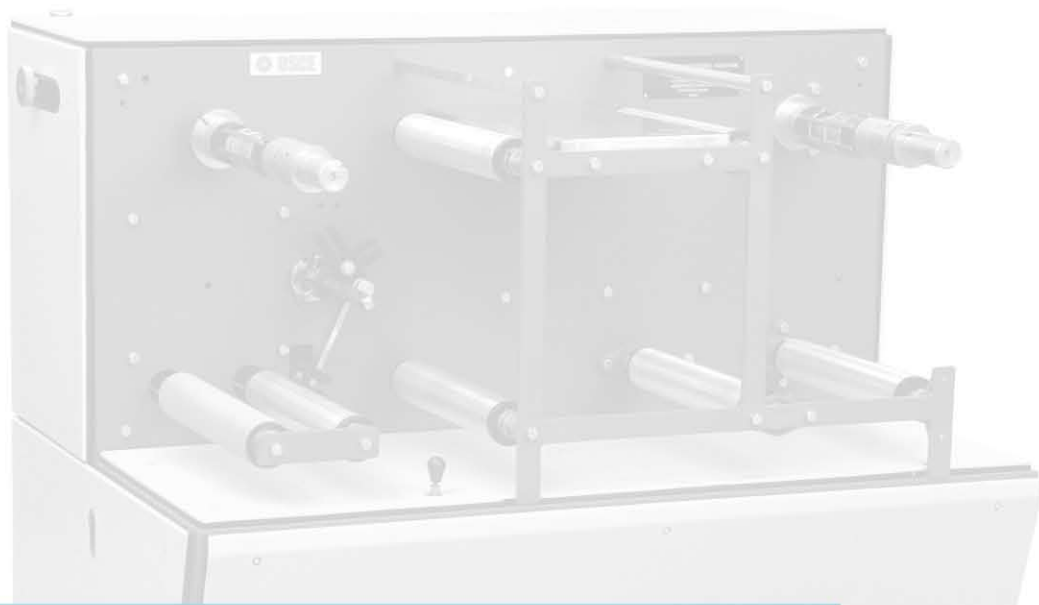

- Auto Tension Control System
- Digital Web Guide System
- Air Expanding Shaft
- Length Counter
- Blower Heater Attachment for Fast Ink Drying
- Stroboscope for Inspection
- Ink Jet Coding Accessory Coding Platform of SS, Eye mark Sensor and Encoder Mounting Attachment

Service

- Competent Consulting Prior to Purchase
- Complete Education of the customer for his buying needs
- On site Installation & Commissioning
- Training of Operating Personnel
- Nation wide Service network with Qualified Engineers
- Prompt after Sales Service Support

▶▶ OM INS 450 Vision Series

Various Models

Speed Range : 50 - 300 mtr. / min.

Rewinding Machine

- Standard Series - OM REW 021 / OM DSP 021
- Super Premium Series - OM REW SP 021 / OM DSP SP 021
- Gold Series - OM REW G 021
- Table Top Series - OM REW TT SP 021
- Vision Series - OM INS 450

Model No.	Width of film
OM REW TT 021 - Table Top Design	upto 150 mm
OM REW 021 - Cantilever Design	upto 450 mm
OM DSP 021 - Wide Web Design	more than 450 mm

Specification Sheet	
Maximum Width : mm	Substrate :
Minimum Width : mm	Maximum Speed : mtr./min.
Core ID : mm	Application :
